

Financial Services Solutions

Today's financial organizations place a lot of demand on their IT systems. Traders, financial analysts and asset managers continuously rely on technology and software applications to help do their job well. But it takes more than just development knowledge and metrics to deploy a successful financial software initiative. That is where we come in.

CHALLENGES IN FINANCIAL SERVICES

Reduced Budgets

As margins diminish, financial service firms must learn how to do more with less.

Compliance and Regulatory Burden

In order to comply with an increase in regulatory requirements, banks and financial institutions have had to expand compliance departments at the expense of their IT budgets.

Customer Satisfaction

Firms should be able to maintain the *white-glove* service that clients expect despite lower margins and less staff.

Sprinterra enables financial service firms to save time and money through the development of customizable platforms that automate processes and build applications including those specifically designed for compliance and regulatory reporting.

- Customized Software Solutions
- Workflow Automation Systems
- End-to-End Solutions
- Data Management Solutions that store, move, and reconcile data

COMPLIANCE AND REGULATORY

Operating in an increasingly scrutinized financial industry, companies are faced with frequently changing regulatory and compliance environments. Reports must contain specific information to address these complex requirements. With a dedicated reporting system in place, you'll be able to tackle these challenges and more.

FINANCIAL REPORTING

The Global Financial Services Industry is complex and varies from country to country. Financial statements must be prepared in strict adherence to various reporting standards. A comprehensive reporting system will help your company accelerate preparation, validation and compliance with the generally accepted accounting practices.

BUSINESS INTELLIGENCE

Financial organizations have been affected by volatile economies, shareholder demands and exorbitant regulatory and compliance mandates in recent years. Many firms have sought methods to analyze information that would allow them to make intelligent decisions quickly. Designing custom BI solutions that provide informative reports and actionable visualization of data will aid industry professionals and investors alike.

BIG DATA

Data rules the financial world and we know how to handle your data efficiently and intelligently. Turning information into valuable insight will help you improve and accelerate your business.

DATA RECONCILIATION

Constant flow of data from different sources requires ongoing verification. Error detection and subsequent remediation proved to be a time consuming task. We know how to automate the reconciliation process and make it efficient.

MIDDLE AND BACK OFFICE AUTOMATION

Our extensive experience working for global financial institutions will help you reduce operational costs and risks while improving data quality, process transparency, and customer experience.

Here's What Our Customers Say:

“Tonight is the production release of MySS and our deployment of the AIS360 data services. The functionality we're delivering tonight exceeds what we originally thought we'd be able to deploy for the November MySS release. Your time and patience, as well as our improved collaboration, helped contribute to this success. I'm looking forward to being able to repeat this in future releases.”
~ SVP Operations, Global Investment Bank

“Just wanted to mention that Jimmy, Denys, Elena, Anton, Natalia, Nayanakshi, Nikolay, Roman, the 3 Sergiis and Stanislav are doing a fantastic job on the ERP app. It looks great and the functionality they built rivals and will exceed actual and data export when completed. Just wanted to thank them all on what a great job they are doing. Thank you, guys.”
~ CTO, Fortune 500 Broker Dealer

“I just wanted to commend you on such a great job done on implementing Pending Jobs. This was a feature I was skeptical of because of the complexity involved with using Quartz Scheduler. The implementation we did with ERP exceeded my expectations especially with Job Groups and Priority.”
~ CIO, Wealth Management Advisory Firm
